

# **Quality Report Mini-Series**

## **OBQI Reports**

### **Review Questions**

1. From the report period dates, which patients do you expect to be included in this report?
2. Why is the number of cases different for the outcomes on page 5 of the report compared to the outcomes on pages 3, 4, and 6.

Locate the End Result Outcomes:

3. Which End Result Outcomes has the largest sample size or number of eligible cases?
4. Which End Result Outcome has the smallest number of eligible cases?

Locate the Utilization Outcomes:

5. One Utilization Outcome is statistically significant. Is this outcome favorable or unfavorable for Faircare compared to the reference?
6. Why is the “Cases” number different for one of the Utilization Outcomes?
7. What does the number 159 mean for the measure of Improvement in Management of Oral Medications (page 4)?
8. Why are there 134 cases for the measure Improvement in Transferring and 365 cases for the measure of Stabilization in Transferring (page 3)?
9. How can you tell if an outcome measure has been risk-adjusted?
10. How can you determine if there is a statistically significant difference between the HHA’s current outcome measure and the reference?
